PROFESSIONAL SUMMARY

Computer Engineer with over 6 years of web development experience. Proficient in Laravel and JavaScript, with a strong ability to integrate Docker into workflows and manage the full development lifecycle: from data architecture and server administration (WHM/cPanel) to the implementation of dynamic and scalable interfaces.

PROFESSIONAL EXPERIENCE

Full Stack Developer | Databyte S.A | Aug 2020 - May 2026

- Led the development of Full Stack applications (Laravel/JS) in Docker environments, optimizing performance and standardizing deployments.
- Implemented complex integrations with Meta APIs (OAuth) and multiple payment gateways (Mercado Pago, PayPal, Webpay) for e-commerce platforms.
- Automated infrastructure management by integrating APIs with WHM and cPanel for domain and hosting account administration.
- Developed custom modules and plugins for WordPress and PrestaShop, extending native functionalities according to business requirements.

Full Stack Developer | UNEG | Jan 2022 - Oct 2022

- Designed the architecture for an alumni management system, using Angular for the frontend and Lumen (Laravel) for creating backend microservices.
- Optimized data handling through bulk upload processes from Excel files and implemented automated email notification systems.

Frontend Developer | Imagina Colombia | Mar 2019 - Oct 2020

- Built Pixel-Perfect and responsive interfaces with Vue.js, Quasar, and Bootstrap, transforming complex designs from Photoshop, Illustrator, and Fireworks into functional code.
- Developed dynamic views and consumed REST APIs in Laravel, linking server logic with the interface to ensure efficient data management.

Full Stack Developer | 789.mx | Dec 2019 - Jan 2020

- Contributed to the development of an artist subscription platform, implementing the core logic and reactive UI components with Laravel and Vue.js.
- Developed essential client-side and server-side functionalities, ensuring the operability of subscription modules.

Full Stack Developer | UNEXPO | Feb 2019 - Aug 2019

- Designed and developed a Helpdesk system for the centralized management of assets and technical services.
- Configured access control systems (RBAC) and inventory modules for hardware and software.

ACADEMIC BACKGROUND

B.S. in Computer Engineering | Universidad Nacional Experimental de Guayana (UNEG) | 2014 - 2023

TECHNICAL PROFICIENCIES

- **Languages & Frameworks:** JavaScript / TypeScript (jQuery, Angular, React, Vue.js), CSS3 (Tailwind, Bootstrap, SASS), PHP (Lumen, Laravel), HTML5
- **Tools & Servers:** Nginx, CI/CD, CWP, Docker, Redis, WHM / cPanel, Git (GitLab, GitHub)
- **Technical Design:** Adobe (Illustrator, Photoshop)
- **Databases:** MySQL, PostgreSQL
- **E-commerce & CMS:** PrestaShop, WordPress
- **Languages:** Spanish: Native, English: B1 - Intermediate
